

Friday tk terraform main class tk aa jaega..

Only RG and Storage Account

Sunday Afternoon - 4 hours class Landing Zone class

Next Monday se Application Deployment

Dependencies in terraform

Explicit Dependency

Implicit Dependency

```
depends_on = [azurerm_resource_group.rg]
```

Source Code kahi remote pr rakhna pdega

State File ko bhi remote pr rakhna pdega

Github pr rakh denge

Storage account ke andar me blob me rakhte hai

Create one storage account manually with azure portal

Create one container inside the storage account

Jo state file local pr hai usi ko storage account ke andar remote container me le jana hai... isko le jane ke lie naya block aa jata hai usko bolte hai backend block..
