

DevOps Engineer - Site ko deploy sasta, sundr and tikau tarike se karta hai..

Site - Website, Application

3 Tier Application

Jaha Jaha repeat honi ki baat aaegi, waha pr looping concept aa jaega.

Loops in Terraform

Count and Foreach

Count use nahi hota ab

Always `for_each` hi use hota hai..

`for_each` ek meta argument hai

Foreach me ya to set of strings jata ha ya map jata hai..
