

1. Aapka dimag shant nahi hai?
2. Aapko apne upar vishwas nahi hai ki humse hoga?
3. Din bhr overthink karke stress me rehte ho?
4. Kaise itna itna bada course hai kar lenge?
5. Kaise kr paenge itna mehnat roj?

- Minimum 6 hours sleep
- 30 mins brisk walk
- 10 mins OM jaap everyday
- 5 mins deep breathing everyday
- 5 min anulom vilom
- No Social media for sometime
- Jo chize apne niyantran me nahi hai, unhe accept kre.
- Gun guna pani everyday morning
- Daily Diary Likh lo
- Slow ho jao, har kaam ek dum slow slow karo
- Mindset change krna pdega agar Naukri ke baad Freelancing ka kaam badana hai
- Challenge Lena hai - 2 month me krke dikhaenge

- Terraform se rg banane ke lie kya kya chahiye?
1. Terraform install kar denge.
2. Az cli install kar denge
3. Subscription level pr contributor rights lelenge
4. VSCode dal lenge
7. Provider install krna pdega
5. Terraform Code likhna start krenge
6. Ek file banaenge rg.tf uske andar me code likhenge

- Provider kya hota hai?
- Terraform ka ek plugin hota hai (.exe file) kisi bhi cloud platform ya services ke api se baat krne ke shamta deta hai...
- Provider= terraform and cloud ke beech ka bridge hai..
- Terraform khud azure, aws, and gcp pr resource nahi bana skta, to provider us cloud api ko call krke resource create update and delete krta hai..
- Azure provider -> Azure API se baat krega
- GCP provider -> GCP API se baat krega
- AWS provider -> AWS API se baat krega
- Terraform provider is a plugin that enables terraform to communicate with a specific cloud platform API's either azure, aws, gcp and manage its resources.
- Provider install krne ka tarika dekhna hai.
- resource group banane wala code humko dhondhna hai

- Why Provider?
- Azure related kitne provider hai?
- Provider kyu jaruri hai ?
- Provider kaise kaam krta hai?
- Provider kaise install hota hai?
