

Nadi kinare saanp hai and main branch me push krna maha paap hai
1. Jb paap hai toh main branch ko protect krdo ek dum.. Z+ Branch protection rules laga ke
Require Pull request before merging to main branch, require atleast one approver
2. Create feature branch from main branch, and checkout into feature branch
3. Add one rg in the tfvars in map in feature branch
4. git status, git add ., git commit -m "added rg in feature", git push

Maine ek working code ko github me dal dia hai
ek naya rg banana preprod environment - humana-rg

HomeWork
Pull Request raise krna with reviewer and copy1 ko main me merge kar dena
Is pure setup ko AntiGravity se pipeline github actions me banane ka try krna
Pura flow ko km se km record krke 20 baar bolna hai...

Prompt to update resume: Azure p terraform modules se azure devsecops se end to end multi environment monolithic and microservices ka infra deploy kar raha hu, isme apn kya kya agentic AI ka use case bana kar bol skte hai interviews me taki devsecops with AI ka feel aae, calls accha aae and resume me dalne se bdia kaam ho.. kaise kaise banaenge agent banao detail me step by step, LLM, MCP, RAG integrate karke step by step btao kuch scenario joki interviewer impress ho jae aur humko 50 Lakh+ package mil jae...
MCP server kya hota hai, ek baar thoda sa pdlena hai...
MCP server se alg alg tool call krenge, Github call krenge, Github actions call krenge, azure monitoring call krenge, azure cli call krenge,
RAG layer, Terraform standard naming convention, landing zone HLD LLD document, SOP , Architecture Documents, Index form me vector DB me store krenge..
LLM Call : Azure Open AI, Anthropic Claude etc... Reasoning + Tool calling krke alg alg AI agent baanenge, jisme ek multi orchestration agent hoga..
