

Requirement: Create Resource Group using Terraform
Prerequisites
1. Install terraform
2. Install az cli
3. az Login with contributor rights on azure subscription
4. Install VSCode for writing and maintaining the code
5. VScode me ek folder banaenge (landing zone)
6. Create a file main.tf, provider.tf
7. cd karke terminal ke through landing zone folder me
8. terraform --help
9. terraform fmt, terraform validate, terraform plan and terraform apply
IT world me jitne bhi tools hai pichle 7-8 saal me, sbke document bahut bdia hai
Microsoft Azure ne bahut bdia document banaya hai, terraform ka document hashicorp ne bdia lgaya hai.
Document padna sikhna hai, and document pdke HLD banake fir implement krna hai
Slow + Patience + Shant Dimag se krne se hi hoga
Why Terraform? What to learn in Terraform? How to Learn in terraform?
Why Azure? What to learn in Azure? How to Learn in Azure?

Why Terraform?
MultiCloud Support, Infrastructure as a code, Easy to learn, Declarative Approach, State management, Open Source

Terraform
Terraform is a declarative tool using which we can create infra on multiple cloud

How to install Provider?
Create RG using Terraform
